Infrared Sauna

Note: The temperature in the sauna should be between 60-100°C with very dry air inside, allowing perspiration to quickly evaporate. Upon entering the sauna, the body is warmed in the hot environment and perspiration increases. Exiting the heat and chilling the body in cold water after the sauna is an inseparable part of the sauna experience. It cleans out poisons from the body and of course, it is a mentally and physically relaxing experience.

Radiations are experienced as the heating component of the natural sunlight. Far Infrared is a completely safe form of natural light energy and essential for all living things. Infrared Radiation is shown to induce 2-3 times the sweat volume of traditional heat and steam saunas, with a lot less discomfort, and the sweat contains more toxins from the deeper fatty tissue layers below the skin.

Our flagship product Infrared Sauna not only provides unlimited health benefits but also offers a completely rejuvenating experience in just 20 minutes. You are welcome to have a personal experience at our showroom. It is a very Eco friendly and energy saving equipment and very easy to run and maintain it.

Far infrared saunas provide the following health benefits:

- » Better Circulation and Increased Energy » Weight Loss Aid » Maintain Cardiovascular Health » Speed Recovery from Injuries
- » Detoxification » Stress Reduction & Relaxation » Skin Beauty » Improved Immune System

For better understanding the utility and benefits, We can send you on request Medical data and some case studies & Doctors opinions on Infra-RED sauna which clearly speaks about the benefit for this latest technology. We want you to make your life healthy without any extra efforts. We always call it 'Your active way to perfect health'. It Re-energize, re-charge, De-stress & De-toxify your Mind, Body & Soul.

Studies show that it can burn 600 calories in just 20 mins.

Steam Bath

The Steam Bath is totally different from bathing. A steam generator located outside the steam room itself produces clouds of soothing steam in which to bath. The 100% humidity means that for most people, the bathing temperature is most comfortable at around 40°C - 45°C. Steam Bathing is an excellent treatment for respiratory problem, pain relief, and grants better immunity, it enhances the detoxifying capacity of skin by opening pores and flushing impurities from the body, it revives tired and strained muscles after physical exertion. You will discover that a steam bath ahead of bath time is an excellent method of promoting a deep restful sleep. The bathing timing limit is 10 -15 minutes. Do not push your body beyond its comfort levels. Drink plenty of water before and after the steam bath to replace fluids lost during bathing. We are counted among successful Manufacturer, Importer and supplier of Steam Bath. Steam Bath is basically designed by us keeping in mind the various requirements of client to relieve stress. It is very affordable and hence can serve to every class of people. The material used by us in making Steam Bath is of supreme quality.

Note - The use of alcohol, drugs or medication can greatly increase the risk of total hyperthermia.

Hydro therapeutic massage stimulates blood circulation, relieves fatigue and tones muscles. Our whirl pool system converts any previously installed bath tub into a luxurious making installation inside the tub walls a quick and simple procedure. When the retrofitting is complete, the tub looks and performs as if it had been originally installed as a factory whirlpool unit.

The big benefit of having an indoor Jacuzzi versus an outdoor Jacuzzi is that you will be able to use it more frequently. You can always use an indoor Jacuzzi regardless of what the weather outside. Another benefit of using an indoor Jacuzzi is that is safer. You are in the comfort of your own home and you do not have to worry about anything going on outside while you are relaxing.
